King Kong Crew

King Kong Crew is a Stockholm based 5-piece funk band. The present line-up has played together since spring 2004, but the band has existed since 2001 in different constellations.

King Kong Crew has through the years played at almost every venue in Stockholm and many party's and festivals around Sweden. The band has furthermore toured the south and midlands of England several times. They've played around 20-25 British dates since their first gig at Cargo (London) in the summer of 2002. The band has built a large fan base which shows up at every gig. When the band is in England they collaborate a lot with a DJ/producer collective called **Decknology**.

When The Crew plays live they often invite guests to join them on stage. The Crew has played with MC:s, percussionists, keyboard players, DJ:s and horn sections. The number of musicians can therefore vary from 5 to 12 when they play live.

It's not easy to describe the King Kong sound, but try to imagine **Sly Stone** having a mad jam session with **The Roots** at **George Clinton's** house and you won't be that far off.

Or, you can use the bands own name for it; **MONKEY FUNK**.

During the autumn, King Kong will release the album "**Reincarnation Of Fools**". They will also release a single and a video.

King Kong Crew will be on the road and available for bookings throughout Europe from late June to early August 2005. Please reply as quickly as possible as many dates have already been booked.

The band might also be able to do specific dates outside the dates specified above. Please call or email for info.

Oscar Harryson & Pontus Andersson
